INTERDISCIPLINARY HOMEWORK: MATHEMATICS AND EVS

LET'S FIGHT AGAINST – COVID-19 – TOGETHER WE CAN

Dear students,

You have to prepare a board game. This game is similar to the monopoly game. In this you have to list all the activities which help to fight against COVID -19 and activities that promote the spread of the infection. With every corrective measure, you have to write an amount as reward and for every incorrect activity you have to write a penalty of some amount. You have to make false currency notes.

For e.g. – if you reach a box on which social distancing is written – you will get a reward of say rupees 300. In the same way if you reach a box on which it's written – disrespect to the corona warriors – you will have to pay a penalty of rupees 1000. The person who has more money at the end of round one is the winner.

START/ STOP								
	<div style="border: 1px solid black; padding: 10px; width: fit-content; margin: 0 auto;">FIGHT AGAINST COVID 19</div>							

YOU CAN DO SYMBOLIC DRAWINGS OF ACTIVITIES IN EACH BOX TO MAKE THE PRESENTATION MORE MEANINGFUL.

****Revision Worksheet** will be shared in the WhatsApp group.
