

## **Important Update Regarding School Water Supply & Heat Wave Precautions**

### **Dear Parents**

In light of the ongoing heat wave, the school administration is committed to ensuring the health and safety of all our students. We would like to provide an update on our current water supply and the proactive measures we are taking.

We are currently experiencing a lower-than-usual water supply. Please be assured that our administration is in constant communication with the authorities to resolve this issue as quickly as possible.

### **Immediate Actions Taken**

To ensure students remain hydrated and safe during this period, the school has implemented the following measures, effective immediately:

**Water Dispensers:** We have installed additional water dispensers throughout the school premises to ensure easy access to clean drinking water.

**ORS Availability :** Oral Rehydration Salt (ORS) packets are now available in the school for any student feeling the effects of the heat.

**Monitoring:** Teachers have been instructed to provide regular "water breaks" to encourage students to hydrate frequently.

While we are providing these resources, we kindly request that you continue to send your child to school with a full, insulated water bottle to supplement the school's efforts.

We appreciate your patience and understanding as we work through this technical challenge. The wellbeing of our students remains our top priority.

Warm regards,

Principal
